Skills

C# | Python | Excel | Unity | Object oriented Programming

Education

Northern Oklahoma College / Associates in MIS

August 2023 - May 2026, Tonkawa, OK

Relevant programming skills in Java, C++, and python. Participated in Roustabouts, band, jazz band, and Phi Theta Kappa honors society. Got useful experience in business technologies like Microsoft 365.

Oklahoma State University / Bachelors in MIS

August 2026 - Current

Currently learning SQL, Databases, C# for business, business analytics, and other relevant skills.

Projects

SubOptimal / Game developer and designer

2021-2024 | Unity, C#

- implemented core mechanics including movement, weapons, UI, and audio
- Collaborated with a 5 person team during part of the production, coordinating tasks and implementation.
- Managed development from initial prototypes to a final published product on steam.

Modular data driven videogame weapon system

Unity, C#

- Scriptable objects to hold base data for different weapons.
- Optimized flow of data through multiple different classes.

Unity-item-queue-system

Unity, C#

- Queue a method while another method is executing
- Allows items to be put away automatically before a new action is called.
