C# | Excel | Unity | Graphic Design | Video Editing | Sound Design |
Project Management

Education

Northern Oklahoma College / Associates in MIS

August 2023 - May 2026, Tonkawa, OK

Relevant programming skills in Java, C++, and python. Participated in Roustabouts, band, jazz band, and Phi Theta Kappa honors society. Got useful experience in business technologies like Microsoft 365.

Oklahoma State University / Bachelors in MIS

August 2026 - Current

Currently learning SQL, Databases, C# for business, business analytics, and other relevant skills.

Projects

SubOptimal

2021-2024 | Unity, C#

- Independent 3D video game made in Unity.
- Worked with a team of five for part of the development process with a 3 year development time.
- I was project lead and programmer. 22,000+ copies distributed as of 8/22/26"

Modular data driven videogame weapon system

Unity, C#

- Scriptable objects acting as entities to hold data for different weapons.
- Optimized flow of data through multiple different classes.
- One generalized script to create any gun based off the data

Unity-item-queue-system

Unity, C#

- Queue a method while another method is executing.
- Uses interfaces to find all script instances.
- Deactivates scripts if active then runs the original method.
